INDEX TO SUBJECTS

A

Action potential, cardiac, loss of plateau of in hypertonic solutions, 779
— potential parameters affecting excitation-contraction coupling, 421
— potentials, ionic requirements for initiation of in insect muscle fibers, 121
Activation, membrane calcium, in excitation-contraction coupling, 676
— process, evidence for coupling to, inactivation of sodium current in *Myxicola* giant axons, 659
Activity level in population of neurons, relationship between firing rate of single neuron and, experimental evidence for resonant enhancement in population response, 767
Actomyosin, of *Limulus polyphemus*, activation of adenosine triphosphatase of by tropomyosin, 375
Adenosine triphosphatase, activation of, of *Limulus polyphemus* actomyosin by tropomyosin, 375
Adrenaline, biophysical effects of on smooth muscle of rabbit common carotid artery, 92
Ammonium ion receptor, inner quaternary, in potassium channels of node of Ranvier, 388
Anterior byssal retractor muscle of *Mytilus edulis*, action of serotonin on calcium-45 efflux from, 476
Aplysia californica, polypeptide secretion from isolated parietovisceral ganglion of, 47
Artery, rabbit common carotid, smooth muscle of, biophysical effects of adrenaline on, 92
Arthropod visual screening pigments, microspectrophotometry of, 616
Axons, *Myxicola* giant, inactivation of sodium current in, evidence for coupling to activation process, 659

B

Bladder, toad, temperature dependence of vasopressin action on, 519
Blood cell, red. *See* Erythrocyte.
Blowfly, effects of temperature on labellar chemoreceptors of, 213
Bromide and bromine, permeability of thin lipid membranes to, 486
Bromine and bromide, permeability of thin lipid membranes to, 486
Byssal retractor muscle, anterior, of *Mytilus edulis*, action of serotonin on calcium-45 efflux from, 476

C

Caffeine and calcium, interaction between in desensitization of muscle postjunctional membrane receptors, 437
Calcium-45, action of serotonin on efflux from anterior byssal retractor muscle of *Mytilus edulis*, 476
Calcium activation, membrane, in excitation-contraction coupling, 676
— binding and release, influence of hydrogen ion concentration on by skeletal muscle sarcoplasmic reticulum, 22
— and caffeine, interaction between in desensitization of muscle postjunctional membrane receptors, 437
— ion uptake, active, by inside-out and right side–out vesicles of red blood cell membranes, 462
—, role of in regulation of tension in skinned crayfish muscle fiber, 305
— and sodium ions, effects of intracellular iontophoretic injection of on light response of *Limulus* ventral photoreceptors, 701
Capacitance of muscle fibers, theoretical analysis of using distributed model of tubular system, 360
— of skeletal muscle fibers in solutions of low ionic strength, 347
Cardiac action potential, loss of plateau of in hypertonic solutions, 779
— impulse, characteristics of very slow conduction of, 227
Carotid artery, rabbit common, smooth muscle of, biophysical effects of adrenaline on, 92

Cat red cells, high sodium, sulfate flux in, 155
Cell, red blood. *See* Erythrocyte.
— responses, retinal ganglion, in goldfish, dynamic characteristics of, 1
Cells, dual sensitivities of in wolf spider eyes at ultraviolet and visible wavelengths of light, 247
—, *Limulus* ventral photoreceptor, electrogenic sodium pump in, 720
— in median ocellus of *Limulus*, electrophysiological properties of, 167
—, red blood. *See* Erythrocytes.
Cellular, extra-, shunt pathway, ionic conductances of in rabbit ileum, influence of shunt on transmural sodium transport and electrical potential differences, 318
—, intra-, iontophoretic injection of calcium and sodium ions, effects of on light response of *Limulus* ventral photoreceptors, 701
Channel, sodium, permeability of to metal cations in myelinated nerve, 637
Channels, potassium, of node of Ranvier, inner quaternary ammonium ion receptor in, 388
Chemoreceptors, labellar of blowfly, effects of temperature on, 213
Cholesterol monolayers, tetrodotoxin-like interaction of saxitoxin with, 33
Conductances, ionic, of extracellular shunt pathway in rabbit ileum, influence of shunt on transmural sodium transport and electrical potential differences, 318
Conduction of cardiac impulse, characteristics of very slow conduction, 227
Contractile state, molecular probe of, polarization of tryptophan fluorescence from single striated muscle fibers, 103
Contraction, muscle, inhibition of caused by exposure to hypertonic solutions, 689
Contraction-excitation coupling, action potential parameters affecting, 421
— coupling, membrane calcium activation in, 676
Coupling to activation process, evidence for, inactivation of sodium current in *Myxicola* giant axons, 659
—, excitation-contraction, action potential parameters affecting, 421
—, excitation-contraction, membrane calcium activation in, 676
Cow, red cells, changes from high potassium (HK) to low potassium (LK) in bovine, 270
Crayfish muscle fiber, skinned, regulation of tension in, role of calcium, 305
Crustacean motor unit, correlated electrophysiological and ultrastructural studies of, 586

D

Desensitization of muscle postjunctional membrane receptors, interaction between caffeine and calcium in, 437
Dipteran visual system, spectral and polarization sensitivity of, 534
Dry films, orientation of rhodopsin and other pigments in, 201

E

Efflux, calcium-45, action of serotonin on from anterior byssal retractor muscle of *Mytilus edulis*, 476
Electromotive forces in epithelial tissues, electrical potential differences and, 794
Electrophysiological and ultrastructural studies, correlated, of crustacean motor unit, 586
Encoding, dynamics of in population of neurons, 734
Enhancement, resonant, in population response, experimental evidence for, relationship between firing rate of single neuron and level of activity in population of neurons, 767
Epithelial tissues, electrical potential differences and electromotive forces in, 794
Erythrocyte membranes, active calcium ion uptake by inside-out and right side-out vesicles of, 462
Erythrocytes, bovine, changes from high potasium (HK) to low potassium (LK) in, 270
—, cat, high sodium, sulfate flux in, 155
Excitation-contraction coupling, action potential parameters affecting, 421
— coupling, membrane calcium activation in, 676
Extracellular shunt pathway, ionic conductances of in rabbit ileum, influence of shunt on transmural sodium transport and electrical potential differences, 318
Eye, *Limulus*, ultrastructure within lateral plexus of, 285
Eyes, wolf spider, dual sensitivities of cells in at ultraviolet and visible wavelengths of light, 247

F

Fiber, skinned crayfish muscle, regulation of tension in, role of calcium, 305
Fibers, insect muscle, ionic requirements for initiation of action potentials in, 121
—, muscle, theoretical analysis of capacitance of using distributed model of tubular system, 360
—, single striated muscle, polarization of tryptophan fluorescence from, a molecular probe of contractile state, 103
—, skeletal muscle, capacitance of in solutions of low ionic strength, 347
Films, dry, orientation of rhodopsin and other pigments in, 201
Firing rate of single neuron, relationship between and level of activity in population of neurons, experimental evidence for resonant enhancement in population response, 767
Fluorescence, tryptophan, polarization of, from single striated muscle fibers, a molecular probe of contractile state, 103
Fluorometric studies of oxidative metabolism in isolated papillary muscle of rabbit, 135
Frog muscle, mechanical properties of sarcolemma and myoplasm in as function of sarcomere length, 559
— skin, energetics of sodium transport in, electrical potential and oxygen consumption in short-circuited state, 60, 77
— skin, response to steady-state voltage clamping, shunt pathway, 503

G

Ganglion cell responses, retinal, in goldfish, dynamic characteristics of, 1
—, isolated parietovisceral, of *Aplysia californica*, polypeptide secretion from, 47
Goldfish, dynamic characteristics of retinal ganglion cell responses in, 1

H

Hypertonic solutions, inhibition of muscle contraction caused by exposure to, 689
— solutions, loss of plateau of cardiac action potential in, 779

I

Ileum, rabbit, ionic conductances of extracellular shunt pathway in, influence of shunt on transmural sodium transport and electrical potential differences, 318
Impulse, cardiac, characteristics of very slow conduction of, 227
Inactivation of sodium current in *Myxicola* giant axons, evidence for coupling to activation process, 659
Inhibition of muscle contraction caused by exposure to hypertonic solutions, 689
Injection, intracellular iontophoretic, of calcium and sodium ions, effects of on light response of *Limulus* ventral photoreceptors, 701
Insect muscle fibers, ionic requirements for initiation of action potentials in, 121
Intracellular iontophoretic injection of calcium and sodium ions, effects of on light response of *Limulus* ventral photoreceptors, 701
Iontophoretic intracellular injection of calcium and sodium ions, effects of on light response of *Limulus* ventral photoreceptors, 701

L

Labellar chemoreceptors of blowfly, effects of temperature on, 213
Larval mosquito ocelli, spectral sensitivity of, 415
— mosquito, rhodopsin of, 401
Lateral plexus of *Limulus* eye, ultrastructure within, 285
Light response of *Limulus* ventral photoreceptors, effects of intracellular iontophoretic injection of calcium and sodium ions on, 701
—, ultraviolet and visible wavelengths of, dual sensitivities of cells in wolf spider eyes at, 247
—, visible, ultraviolet-induced sensitivity to in ultraviolet receptors of *Limulus*, 186
Limulus eye, ultrastructure within lateral plexus of, 285
—, median ocellus, electrophysiological properties of cells in, 167
— *polyphemus* actomyosin, activation of adenosine triphosphatase of by tropomyosin, 375
—, ultraviolet-induced sensitivity to visible light in ultraviolet receptors of, 186
— ventral photoreceptor cells, electrogenic sodium pump in, 720
— ventral photoreceptors, light response of, effects of intracellular iontophoretic injection of calcium and sodium ions on, 701

Lipid membranes, thin, permeability to bromide and bromine, 486

M

Membrane calcium activation in excitation-contraction coupling, 676
—, nerve constitutents, ionic channels and, tetrodotoxin-like interaction of saxitoxin with cholesterol monolayers, 33
— receptors, muscle postjunctional, interaction between caffeine and calcium in desensitization of, 437
Membranes, red blood cell, active calcium ion uptake by inside-out and right side-out vesicles of, 462
—, thin lipid, permeability to bromide and bromine, 486
Metabolism, oxidative, fluorometric studies of in isolated papillary muscle of rabbit, 135
Metal cations, permeability of sodium channel to in myelinated nerve, 637
Microspectrophotometry of arthropod visual screening pigments, 616
Model, distributed, of tubular system, theoretical analysis of capacitance of muscle fibers using, 360
Molecular probe of contractile state, polarization of tryptophan fluorescence from single striated muscle fibers, 103
Monolayers, cholesterol, tetrodotoxin-like interaction of saxitoxin with, 33
Mosquito, larval, rhodopsin of, 401
— ocelli, larval, spectral sensitivity of, 415
Motor unit, crustacean, correlated electrophysiological and ultrastructural studies of, 586
Muscle, anterior byssal retractor, of *Mytilus edulis*, action of serotonin on calcium-45 efflux from, 476
— contraction, inhibition of caused by exposure to hypertonic solutions, 689
— fiber, skinned crayfish, regulation of tension in, role of calcium, 305
— fibers, capacitance, theoretical analysis of using distributed model of tubular system, 360
— fibers, insect, ionic requirements for initiation of action potentials in, 121
— fibers, single striated, polarization of tryptophan fluorescence from, a molecular probe of contractile state, 103
— fibers, skeletal, capacitance of in solutions of low ionic strength, 347
Muscle, frog, mechanical properties of sarcolemma and myoplasm in as function of sarcomere length, 559
—, isolated papillary of rabbit, fluorometric studies of oxidative metabolism in, 135
— postjunctional membrane receptors, interaction between caffeine and calcium in desensitization of, 437
—, skeletal, sarcoplasmic reticulum, influence of hydrogen ion concentration on calcium binding and release by, 22
—, smooth, of rabbit common carotid artery, biophysical effects of adrenaline on, 92
Myelinated nerve, permeability of sodium channel to metal cations in, 637
Myoplasm and sarcolemma, mechanical properties of in frog muscle as function of sarcomere length, 559
Mytilus edulis, anterior byssal retractor muscle of, action of serotonin on calcium-45 efflux from, 476
Myxicola giant axons, inactivation of sodium current in, evidence for coupling to activation process, 659

N

Nerve membrane constituents, ionic channels and, tetrodotoxin-like interaction of saxitoxin with cholesterol monolayers, 33
—, myelinated, permeability of sodium channel to metal cations in, 637
Neuron, single, firing rate, relationship between and level of activity in population of neurons, experimental evidence for resonant enhancement in population response, 767
Neurons, population of, dynamics of encoding in, 734
—, population of, relationship between firing rate of single neuron and level of activity in, experimental evidence for resonant enhancement in population response, 767
Node of Ranvier, inner quaternary ammonium ion receptor in potassium channels of, 388

O

Ocelli, larval mosquito, spectral sensitivity of, 415
Ocellus, median, of *Limulus*, electrophysiological properties of cells in, 167

Oxidative metabolism, fluorometric studies of, in isolated papillary muscle of rabbit, 135
Oxygen consumption in short-circuited state, sodium transport in frog skin, 60, 77

P

Papillary muscle, isolated, of rabbit, fluorometric studies of oxidative metabolism in, 135
Parietovisceral ganglion, isolated, of *Aplysia californica*, polypeptide secretion from, 47
Permeability of sodium channel to metal cations in myelinated nerve, 637
— of thin lipid membranes to bromide and bromine, 486
Photoreceptor cells, *Limulus* ventral, electrogenic sodium pump in, 720
Photoreceptors, *Limulus* ventral, light response of, effects of intracellular iontophoretic injection of calcium and sodium ions on, 701
Pigments, arthropod visual screening, microspectrophotometry of, 616
—, orientation of rhodopsin and other pigments in dry films, 201
Plateau of cardiac action potential, loss of in hypertonic solutions, 779
Plexus, lateral of *Limulus* eye, ultrastructure within, 285
Polypeptide secretion from isolated parietovisceral ganglion of *Aplysia californica*, 47
Population of neurons, dynamics of encoding in, 734
— of neurons, relationship between firing rate of single neuron and level of activity in, experimental evidence for resonant enhancement in population response, 767
Postjunctional membrane receptors, muscle, interaction between caffeine and calcium in desensitization of, 437
Potassium channels of node of Ranvier, inner quaternary ammonium ion receptor in, 388
–, high (HK) and low (LK), changes from in bovine red cells, 270
Pump, electrogenic sodium, in *Limulus* ventral photoreceptor cells, 720

R

Ranvier, node of, inner quaternary ammonium ion receptor in potassium channels of, 388
Rate, firing, of single neuron, relationship between and level of activity in population of neurons, experimental evidence for resonant enhancement in population response, 767
Red blood cell. *See* Erythrocyte.
Regulation of tension in skinned crayfish muscle fiber, role of calcium, 305
Resonant enhancement in population response, experimental evidence for, relationship between firing rate of single neuron and level of activity in population of neurons, 767
Response, light, of *Limulus* ventral photoreceptors, effects of intracellular iontophoretic injection of calcium and sodium ions on, 701
Responses, retinal ganglion cell, in goldfish, dynamic characteristics of, 1
Reticulum, sarcoplasmic, skeletal muscle, influence of hydrogen ion concentration on calcium binding and release by, 22
Retinal ganglion cell responses in goldfish, dynamic characteristics of, 1
Retractor muscle, anterior byssal of *Mytilus edulis*, action of serotonin on calcium-45 efflux from, 476
Rhodopsin of larval mosquito, 401
— and other pigments, orientation of in dry films, 201

S

Sarcolemma and myoplasm, mechanical properties of in frog muscle as function of sarcomere length, 559
Sarcomere length, mechanical properties of sarcolemma and myoplasm in frog muscle as function of, 559
Sarcoplasmic reticulum, skeletal muscle, influence of hydrogen ion concentration on calcium binding and release by, 22
Saxitoxin, tetrodotoxin-like interaction of with cholesterol monolayers, 33
Screening pigments, arthropod visual, microspectrophotometry of, 616
Secretion, polypeptide, from isolated parietovisceral ganglion of *Aplysia californica*, 47
Sensitivities, dual, of cells in wolf spider eyes at ultraviolet and visible wavelengths of light, 247

Sensitivity, spectral, of larval mosquito ocelli, 415
—, spectral and polarization, of dipteran visual system, 534
—, ultraviolet-induced, to visible light in ultraviolet receptors of *Limulus*, 186
Serotonin, action of on calcium-45 efflux from anterior byssal retractor muscle of *Mytilus edulis*, 476
Short-circuited state, oxygen consumption in, sodium transport in frog skin, 60
Shunt, ionic conductances of extracellular pathway in rabbit ileum, influence of on transmural sodium transport and electrical potential differences, 318
— pathway, response of frog skin to steady-state voltage clamping, 503
Skeltal muscle fibers, capacitance of in solutions of low ionic strength, 347
— muscle sarcoplasmic reticulum, influence of hydrogen ion concentration on calcium binding and release by, 22
Skin, frog, energetics of sodium transport in, electrical potential and oxygen consumption in short-circuited state, 60, 77
—, frog, response to steady-state voltage clamping, shunt pathway, 503
Skinned crayfish muscle fiber, regulation of tension in, role of calcium, 305
Smooth muscle of rabbit common carotid artery, biophysical effects of adrenaline on, 92
Sodium and calcium ions, effects of intracellular iontophoretic injection of on light response of *Limulus* ventral photoreceptors, 701
— channel, permeability of to metal cations in myelinated nerve, 637
— current, inactivation of in *Myxicola* giant axons, evidence for coupling to activation process, 659
—, high, sulfate flux in cat red cells, 155
— pump, electrogenic, in *Limulus* ventral photoreceptor cells, 720
— transport, energetics of in frog skin, electrical potential and oxygen consumption in short-circuited state, 60, 77
— transport, transmural, influence of shunt on and electrical potential differences in ionic conductances of extracellular shunt pathway in rabbit ileum, 318
Spectral and polarization sensitivity of dipteran visual system, 534
— sensitivity of larval mosquito ocelli, 415
Spider eyes, wolf, dual sensitivities of cells in at ultraviolet and visible wavelengths of light, 247
Steady-state voltage clamping, response of frog skin to, shunt pathway, 503
Striated muscle fibers, single, polarization of tryptophan fluorescence from, a molecular probe of contractile state, 103
Sulfate flux in high sodium cat red cells, 155
System, tubular, theoretical analysis of capacitance of muscle fibers using distributed model of, 360

T

Tension, regulation of in skinned crayfish muscle fiber, role of calcium, 305
Tetrodotoxin-like interaction of saxitoxin with cholesterol monolayers, 33
Tissues, epithelial, electrical potential differences and electromotive forces in, 794
Toad bladder, temperature dependence of vasopressin action on, 519
Triphosphatase, adenosine, activation of, of *Limulus polyphemus* actomyosin by tropomyosin, 375
Tropomyosin, activation of adenosine triphosphatase of *Limulus polyphemus* actomyosin by, 375
Tryptophan fluorescence, polarization of, from single striated muscle fibers, a molecular probe of contractile state, 103
Tubular system, theoretical analysis of capacitance of muscle fibers using distributed model of, 360

U

Ultrastructural and electrophysiological studies, correlated, of crustacean motor unit, 586
Ultrastructure within lateral plexus of *Limulus* eye, 285
Ultraviolet and visible wavelengths of light, dual sensitivities of cells in wolf spider eyes at, 247
Ultraviolet-induced sensitivity to visible light in ultraviolet receptors of *Limulus*, 186
Uptake, active calcium ion, by inside-out

and right side–out vesicles of red blood cell membranes, 462

V

Vasopressin, temperature dependence of action on toad bladder, 519
Vesicles, inside-out and right side–out, of red blood cell membranes, active calcium uptake by, 462
Visual screening pigments, arthropod, microspectrophotometry of, 616
— system, dipteran, spectral and polarization sensitivity of, 534

W

Wavelengths, ultraviolet and visible of light, dual sensitivities of cells in wolf spider eyes at, 247

THE JOURNAL OF GENERAL PHYSIOLOGY

FOUNDED BY JACQUES LOEB

Honorary Editors

L. R. BLINKS
DETLEV W. BRONK
ALFRED E. MIRSKY
JOHN H. NORTHROP

Editor

PAUL F. CRANEFIELD

Editorial Board

CONTENTS OF VOLUME 59

NUMBER 1, JANUARY, 1972

1 Nico A. M. Schellart and Henk Spekreijse. Dynamic characteristics of retinal ganglion cell responses in goldfish

22 Yoshiaki Nakamaru and Arnold Schwartz. The influence of hydrogen ion concentration on calcium binding and release by skeletal muscle sarcoplasmic reticulum

33 Raimundo Villegas and Flor V. Barnola. Ionic channels and nerve membrane constituents. Tetrodotoxin-like interaction of saxitoxin with cholesterol monolayers

47 S. Arch. Polypeptide secretion from the isolated parietovisceral ganglion of *Aplysia californica*

60 F. L. Vieira, S. R. Caplan, and A. Essig. Energetics of sodium transport in frog skin. I. Oxygen consumption in the short-circuited state

77 F. L. Vieira, S. R. Caplan, and A. Essig. Energetics of sodium transport in frog skin. II. The effects of electrical potential on oxygen consumption

92 F. Mekata and H. Niu. Biophysical effects of adrenaline on the smooth muscle of the rabbit common carotid artery

103 C. G. dos Remedios, R. G. C. Millikan, and M. F. Morales. Polarization of tryptophan fluorescence from single striated muscle fibers. A molecular probe of contractile state

NUMBER 2, FEBRUARY, 1972

121 Hiroshi Washio. The ionic requirements for the initiation of action potentials in insect muscle fibers

135 J. Brian Chapman. Fluorometric studies of oxidative metabolism in isolated papillary muscle of the rabbit

155 R. I. Sha'afi and E. Pascoe. Sulfate flux in high sodium cat red cells

167 John Nolte and Joel E. Brown. Electrophysiological properties of cells in the median ocellus of *Limulus*

186 John Nolte and Joel E. Brown. Ultraviolet-induced sensitivity to visible light in ultraviolet receptors of *Limulus*

201 Woodring E. Wright, Paul K. Brown, and George Wald. The orientation of rhodopsin and other pigments in dry films

213 S. Uehara and H. Morita. The effects of temperature on the labellar chemoreceptors of the blowfly

227 Paul F. Cranefield, Andrew L. Wit, and Brian F. Hoffman. Conduction of the cardiac impulse. III. Characteristics of very slow conduction

NUMBER 3, MARCH, 1972

247 Robert D. DeVoe. Dual sensitivities of cells in wolf spider eyes at ultraviolet and visible wavelengths of light

270 YEDY ISRAEL, ALAIN MACDONALD, JAIME BERNSTEIN, and EDUARDO ROSENMANN. Changes from high potassium (HK) to low potassium (LK) in bovine red cells

285 MOSHE GUR, RICHARD L. PURPLE, and RUSSELL WHITEHEAD. Ultrastructure within the lateral plexus of the *Limulus* eye

305 P. W. BRANDT, J. P. REUBEN, and H. GRUNDFEST. Regulation of tension in the skinned crayfish muscle fiber. II. Role of calcium

318 RAYMOND A. FRIZZELL and STANLEY G. SCHULTZ. Ionic conductances of extracellular shunt pathway in rabbit ileum. Influence of shunt on transmural sodium transport and electrical potential differences

347 P. C. VAUGHAN, J. N. HOWELL, and R. S. EISENBERG. The capacitance of skeletal muscle fibers in solutions of low ionic strength

360 R. S. EISENBERG, P. C. VAUGHAN, and J. N. HOWELL. A theoretical analysis of the capacitance of muscle fibers using a distributed model of the tubular system

NUMBER 4, APRIL, 1972

375 WILLIAM LEHMAN and ANDREW G. SZENT-GYÖRGYI. Activation of the adenosine triphosphatase of *Limulus polyphemus* actomyosin by tropomyosin

388 CLAY M. ARMSTRONG and BERTIL HILLE. The inner quaternary ammonium ion receptor in potassium channels of the node of Ranvier

401 PAUL K. BROWN and RICHARD H. WHITE. Rhodopsin of the larval mosquito

415 EDWARD B. SELDIN, RICHARD H. WHITE, and PAUL K. BROWN. Spectral sensitivity of larval mosquito ocelli

421 STUART R. TAYLOR, HANNA PREISER, and ALEXANDER SANDOW. Action potential parameters affecting excitation-contraction coupling

437 DAVID E. COCHRANE and RODNEY L. PARSONS. The interaction between caffeine and calcium in the desensitization of muscle postjunctional membrane receptors

462 MYRA L. WEINER and KWANG SOO LEE. Active calcium ion uptake by inside-out and right side–out vesicles of red blood cell membranes

476 EUNICE BLOOMQUIST and BRIAN A. CURTIS. The action of serotonin on calcium-45 efflux from the anterior byssal retractor muscle of *Mytilus edulis*

486 JOHN GUTKNECHT, L. J. BRUNER, and D. C. TOSTESON. The permeability of thin lipid membranes to bromide and bromine

NUMBER 5, MAY, 1972

503 LAZARO J. MANDEL and PETER F. CURRAN. Response of the frog skin to steady-state voltage clamping. I. The shunt pathway

519 PATRICK EGGENA. Temperature dependence of vasopressin action on the toad bladder

534 GILBERT D. MCCANN and DAVID W. ARNETT. Spectral and polarization sensitivity of the dipteran visual system

559 STANLEY I. RAPOPORT. Mechanical properties of the sarcolemma and myoplasm in frog muscle as a function of sarcomere length

586 R. G. Sherman and H. L. Atwood. Correlated electrophysiological and ultrastructural studies of a crustacean motor unit

616 G. K. Strother and A. J. Casella. Microspectrophotometry of arthropod visual screening pigments

NUMBER 6, JUNE, 1972

637 Bertil Hille. The permeability of the sodium channel to metal cations in myelinated nerve

659 L. Goldman and C. L. Schauf. Inactivation of the sodium current in *Myxicola* giant axons. Evidence for coupling to the activation process

676 Guilherme Suarez-Kurtz, John P. Reuben, Philip W. Brandt, and Harry Grundfest. Membrane calcium activation in excitation-contraction coupling

689 M. Miyamoto and J. I. Hubbard. On the inhibition of muscle contraction caused by exposure to hypertonic solutions

701 J. E. Lisman and J. E. Brown. The effects of intracellular iontophoretic injection of calcium and sodium ions on the light response of *Limulus* ventral photoreceptors

720 J. E. Brown and J. E. Lisman. An electrogenic sodium pump in *Limulus* ventral photoreceptor cells

734 Bruce W. Knight. Dynamics of encoding in a population of neurons

767 Bruce W. Knight. The relationship between the firing rate of a single neuron and the level of activity in a population of neurons. Experimental evidence for resonant enhancement in the population response

779 Kent Hermsmeyer, Russell Rulon, and Nick Sperelakis. Loss of the plateau of the cardiac action potential in hypertonic solutions

794 Letter to the Editor

Stanley G. Schultz. Electrical potential differences and electromotive forces in epithelial tissues
